

Work Experience

UX/UI Engineer

DeepIDV (Vancouver, BC, Canada)

Sep 2025 - Present

Led the end-to-end redesign of DeepIDV’s enterprise identity-verification suite (DeepIDV, DeepCam, and DeepDoc & Sign), transforming fragmented KYC, document, and e-signature workflows into a unified, minimalist experience that enhanced operational clarity, compliance readiness, and user trust across verification journeys.

Developed responsive, production-ready front-end interfaces using React, TypeScript, Tailwind CSS, and Framer Motion, translating design systems into scalable, high-performance components for real-world deployment.

Extended and maintained the existing design system to align with updated brand direction, ensuring seamless translation of design into development and consistent implementation across enterprise products.

Web Development & Media Design Intern

Convergence & Pixel Ramen (Vancouver, BC, Canada)

May 2025 - July 2025

Participated in the development of Simuhealth, a growing SaaS product, by implementing features, ensuring UI consistency using TypeScript and React, and collaborating closely with developers and designers on cross-functional QA testing, bug identification, and resolution to enhance product reliability.

Contributed to UX/UI improvements by redesigning components and integrating design systems, resulting in improved user experience and visual coherence across the platform.

Designed and produced graphic and motion assets for digital campaigns and social media using Photoshop, Illustrator, and After Effects, enhancing visual storytelling and boosting user engagement and brand awareness.

UX/UI Designer & Front-End Developer

Freelance - Various clients in Canada

November 2024 - April 2025

Improved user experience and visual consistency by redesigning client websites, creating and applying design systems, and resolving usability issues through iterative feedback, resulting in an average 25–35% increase in site traffic and engagement time.

Developed responsive websites using React and Tailwind CSS, integrating third-party APIs and collaborating with backend developers. Also delivered WordPress-based solutions optimized for scalability and 40% faster page loads.

Communicated with clients, designers, and developers throughout each project to align design and development goals, ensuring timely delivery and a high level of client satisfaction.

Graphic Designer

Freelance - Various clients in South Korea and Canada

May 2023 - February 2025

Designed logos and brand visuals for clients across various industries, including restaurants and a digital marketing agency, ensuring each brand’s identity was visually distinctive and clearly communicated.

Delivered branding and marketing materials such as packaging, menus, and brochures, incorporating client feedback throughout the process to create cohesive, audience-appropriate designs.

Maintained close communication with clients to understand business goals, iterate on visual concepts, and support successful product launches and promotional efforts.

Projects

<Fluffy Rabbit> Emoji Launch

August 2023

Launched a hand-drawn emoji set on Naver, a major Korean platform, after 6 months and 4 failed attempts. These emojis were designed for use across blog posts and platform content. Studied successful examples by analyzing visual trends, grid systems, and illustration styles to refine the design and improve clarity and appeal.

Tools

Design

Figma · Adobe Photoshop · Adobe Illustrator · Adobe After Effects · Adobe InDesign · Adobe Dimension

Development

JavaScript · TypeScript · React · Next.js · React Native · HTML · CSS · jQuery · Express.js · PHP · WordPress · Tailwind CSS · Bootstrap · Framer Motion · GSAP · Git · GitHub · Postman

Technical Skills

UX/UI Design

UX Research & Analysis · Persona Development · User Journey Mapping · Information Architecture · Wireframing & Prototyping · UI Design · Design System Creation & Maintenance · Usability Testing · Iterative Design
