

Fluffy Rabbit

Launching my own emoji set was one of the items on my bucket list. Over the course of six months, I faced about four rejections during the approval process. At first, I simply focused on drawing without much strategy, but after each failure, I carefully studied my designs alongside those that had been successfully approved by the platform. Through continuous research and comparison, I was finally able to get approval on my fifth submission. This experience taught me the value of perseverance, consistent effort, and improving my design adaptability. It became a meaningful milestone in my creative journey.
